

BUSINESS SPOTLIGHT

BSGI: KEEPING YOU SAFE & SECURE

In these uncertain times, security and safety are top of mind for business owners. Berkshire Systems Group, Inc. has been in the life-safety business for decades. From our roots in the fire-protection industry, we've expanded over the years to include a comprehensive product & service portfolio that meets your safety, security, and communication needs. This year marks an important milestone as we are now a WBE-certified company. This enhances our ability to serve our entire customer base by meeting their requirements to work with minority-owned businesses.

Fire Protection, Sprinkler & Suppression Systems: Sales, Service, and Testing

Did you know that every 24 seconds, a fire department responds to a fire somewhere in the United States? * With that in mind, BSGI is committed to the safety of our clients and first responders. We are proud to offer the latest in fire protection technology. From new buildings to existing structures, our NICET-certified sales staff and technicians ensure your compliance with ever-changing fire alarm industry codes.

We even ensure radio signal strength is up to code in your building. This helps first responders and emergency personnel stay in touch when on your property. Our BDA (Bi-Directional Amplifier) systems enhance the coverage of emergency communications, optimizing on-site emergency services.

Concerned about being up to code? Routine inspection and testing are a major part of making sure your building is protected and up to code. BSGI provides a full spectrum of services from wet / dry systems to fire pumps, extinguishers and more. Our experts conduct on-site surveys in addition to servicing and testing your Sprinkler and Fire Suppression Systems.

BETH HAHN, PRESIDENT

Protecting People & Property

BSGI works with many private and public entities, protecting people and property. The pandemic has magnified how important it is to have systems in place that lock down and provide security at a moment's notice. Our security, surveillance, and door access systems can reduce touch points, provide elevated temperature readings and enable an owner to feel confident about the security of the unoccupied building. We offer managed services as well, whereby BSGI remotely controls systems, providing peace of mind to our customers. *Saving lives through intrusion, access, and video systems is a large part of what we do.*

Communications

No communications expert on staff? No problem. Our communications team can serve as your go-to crew to provide professionally designed and installed A/V systems. BSGI can also coordinate with your staff to meet your unique needs. We offer a full communications package to clients in a wide variety of industries, from education & healthcare to churches and private-sector organizations. Through paging systems, auditorium/stadium sound systems, clock systems and intercom, we ensure your message can be quickly delivered to the masses.
