## Trusted Drug Testing Solutions for Employers

If you've ever been frustrated managing your drug testing program, we understand. Let Drug Guard run your program. We help identify and address hidden gaps, so you never have to worry about costly mistakes or critical details being overlooked.

Drug Guard is a workforce compliance and drug and alcohol testing partner focused on helping employers reduce risk, maintain regulatory alignment, and keep operations running safely. Serving both DOT-regulated and non-regulated industries, Drug Guard delivers a full suite of services, including pre-employment, random, post-accident, and reasonable suspicion testing, through both rapid and laboratory-based methods. With 24/7/365 availability and mobile, on-site capabilities, the company is built to meet employers where they operate, whether in the field, at a job site, or across multiple locations.

What differentiates Drug Guard is its emphasis on identifying and closing compliance gaps that often go unnoticed until they become liabilities. From program design and policy alignment to supervisor training and audit readiness, Drug Guard operates as an extension of its clients' teams, bringing structure, visibility, and accountability to complex testing programs. The company also supports third-party administrators (C/TPAs), enabling them to expand their service offerings while maintaining consistency and control across their client base through their Origin One software.

As Drug Guard continues to grow, its mission remains consistent: to simplify compliance, reduce risk exposure, and deliver dependable testing services that employers can trust. Through a combination of technology, operational expertise, and responsive service, Drug Guard helps organizations build safer, more compliant workplaces.

For more information or to discuss your organization's testing needs, contact Drug Guard at 610-285-4100 or [main@drug-guard.com](mailto:main@drug-guard.com).
