# What is Check Washing?

Criminals can steal mailed paper checks, such as by fishing them from USPS mailboxes, robbing postal workers, or taking them from personal mailboxes. They alter the checks by washing off the ink, changing the amount or payee, and then depositing them to steal money from your account. If a check you sent was never received by the recipient, you might be a victim of check washing.

### HOW CAN YOU PROTECT YOURSELF?

- ▶ Use pens with indelible black ink so it is more difficult to wash your checks.
- ▶ Follow up with charities and other businesses to make sure they received your check.
- ▶ Use online banking to review copies of your checks to ensure they were not altered.
- ▶ If you still receive paid checks back from the bank, shred – don't just trash them.
- ▶ Regularly review your bank activity and statements for errors.
- ▶ Don't leave blank spaces in the payee or amount lines of checks you write.
