

# BUSINESS SPOTLIGHT

JAKUB MOCHON

## The Junkluggers of Berks, Chester & Lancaster Counties!

About one year ago, Jakub Mochon left his career of twenty years in the medical device industry and launched *The Junkluggers of Berks, Chester & Lancaster Counties!* Jakub decided to bring the business right to his local area, as he has been a resident of Chester and Berks Counties for the past eighteen years. *The Junkluggers* is rapidly growing in Pennsylvania and is proud to service residential customers and businesses in Berks, Chester and Lancaster counties! The fast-growing eco-friendly junk removal company is on a mission to make Pennsylvania a little greener and eliminate 100 percent of reusable waste from landfills by the year 2025.

Jakub has always been passionate about the environment and the community in this area of Pennsylvania which he calls home. His team of big-hearted professionals are different from anywhere else — they focus on green, community-oriented practices, striving to enhance lives, the community, and the environment by donating, recycling, upcycling and supporting local charities — many of whom benefit greatly from the company's donations.

Customers choose *The Junkluggers* every day because they care about the environment, and they do not want their belongings to end up in the landfill. Just as much as their customers care about the environment, this team cares about their customers and focuses on delivering excellent customer service — a critical differentiation.

*The Junkluggers* will give you a peace of mind in not only knowing they will remove your junk, but they will also recycle and donate your items — you'll

even receive a donation receipt! In *The Junkluggers'* hands, your junk items will always go to good use or help the environment! "It's all about helping out our community, taking junk away and then giving back to those who need it," Jakub explains. *The Junkluggers* truly want to make a positive impact on the world and Jakub strives to do just that right here in Berks, Chester and Lancaster Counties — with every job taken, every decision made, and every piece of junk encountered.
