Tech Materials Company, Automation Services

Tech Materials Company, Automation Services is the new name of a Berks County business that has served local, regional, and national customers since 1996. Principal Engineer and owner, Tobi D. Mengle, P.E. has provided customized Rockwell Automation (Allen-Bradley) hardware and software solutions to the biotech, food, and chemical industries, and is looking to help area businesses with existing or new automation proj-

ects. Services include: concept development; system design; control panel design and construction; and software development, commissioning, testing and implementation. Typical hardware platforms include the latest Control/Compact Logix PLC's with PanelView HMI's to legacy SLC systems. Variable Frequency Drive (VFD) integration for motor speed and performance control is also a typical major system component.

Automation systems are an investment to improve production safety, quality, and capacity for operations that are well defined and often repetitive. TMC works with customers to define requirements, design appropriate system solutions, and then builds and delivers systems that are cost efficient and maintainable. We are proud to say that with the reliability of past and current Rockwell hardware, there are production systems designed and

installed by TMC that continue to deliver for the client after 15 years.

If you have an automation project in mind and would like to discuss with an experienced professional, please give us a call or email. We provide competitive bids to defined scope, or can work on a T&E basis. We also provide automation support for existing plant or production systems. Please contact Tobi at 610.334.3055 or tobi@techmaterialsco.com.

Since founding Kaiser Construction in 1986, David Leinbach has always made it our goal to do business with integrity, honesty, and excellence. We combine this way of doing business with an old-fashioned commitment to quality craftsmanship while maintaining the highest level of performance. We provide all of this at a fair price. We apply this philosophy to everything we do and to all our interactions with people whether customers, vendors, peers, or our employees. Through the years we have never forgotten that good business principals are what make for happy and satisfied customers as well as a successful business.

In 2010; Martin Construction was acquired as an "Asset-Sale Only". In 2017 the decision was made to merge the companies under the umbrella of Kaiser Construction Company Inc. and change the name to The Kaiser-Martin Group. The strength of the two companies positions us well for today and into the future as a premier Design-Build Construction company.

KAISER MARTIN GROUP
INTEGRITY IS OUR FOUNDATION
