

## TriCounty HOME HEALTH & HOSPICE

At TriCounty Home Health, we provide a wide range of healthcare services, provided in the comfort of patients' homes, for illness, injury, recovery from surgery, or management of a chronic condition.

We specialize in clinical programs that help keep patients out of the hospital, maintain their independence, and improve their health and quality of life. Our clinical programs utilize proven methods, supplemented with more modern techniques, that are specifically related to patient and caregiver education. Each patient receives a special book tailored to their condition, with each chapter aligning with the specific care pathways our nurses follow.

For diabetic patients, we have **Choose Control**. Patients on **Choose Control** learn to monitor their blood sugar, create a meal plan, add activity into their lifestyle, properly manage their medication, and how to improve their overall health. For patients with chronic lung disease, including COPD, we have **ClearWay**. Patients on **ClearWay** learn how to retrain their breathing, exercise safely, conserve energy, handle oxygen safely, take medications (including nebulizers and inhalers) appropriately, and quit smoking.

For patients needing therapy, we also provide programs including Active Life Balance, Customized Orthopedic, Continence Control, and more. Therapy patients receive a customized treatment plan and work directly with our physical, occupational, and speech therapists.

Home health is 100 percent covered by Medicare fee-for-service, and Medicaid and private insurance provide some coverage with coinsurance or deductibles that may apply.

***If you think home health may be right for you, but still have more questions, we are happy to help. Call us today at [855.237.0195](tel:855.237.0195) to speak directly with one of our team members. We want to help you and your loved ones get the care you need and deserve.***
