YOUNG MEDICAL SPA OFFERS HAIR GROWTH & LOSS PREVENTION TREATMENTS FOR MEN AND WOMEN

Thinning hair isn't just a concern for men. It's estimated that 21 million women in America are also experiencing thinning hair. At Young Medical Spa we offer hair growth & loss prevention treatments for both men and women. We call these services PRP and PRP with Exosomes.

PRP stands for platelet-rich plasma. The process involves drawing blood, processing the blood into PRP, and then injecting the PRP into the scalp. The platelets contain many

growth factors that stimulate hair growth. This treatment is offered as a package of three sessions, taking place four weeks apart. No downtime is required for this treatment and results are typically seen within six-nine months.

Exosomes are a type of extracellular vesicle that contain signals and growth factors to stimulate hair. Exosomes are made from stem cells and when combined with PRP they make the treatment even stronger! So strong in fact that

results are typically seen in six months with a one-time treatment.

Find out if these procedures are right for you by taking advantage of a free consultation provided in person or remotely over Zoom! Visit youngmedicalspa.com to schedule and learn about all the services at our four convenient locations in Center Valley, Lansdale, Wilkes-Barre, and Bala Cynwyd.
