Limerick Generating Station

Providing Safe and Reliable Power

Limerick is a safe and reliable 'always-on' source of electricity for the regional power grid. According to a 2010 Continental Economics report, Limerick reduces wholesale energy costs in Pennsylvania by approximately \$880 million per year, which results in significant consumer savings.

Supporting Our Community

Limerick provides more than 800 well-paying jobs and contributes approximately \$600,000 to community organizations each year. Limerick contributes \$113 million annually in direct economic contributions to Pennsylvania, including \$75 million in employee wages and salaries, \$35 million in purchases of goods and services from other Pennsylvania businesses and \$2.9 million in property tax payments.

Protecting Our Environment

Limerick generates enough carbon-free electricity to power more than two million homes. According to the Continental Economics report, if Limerick were retired from service, annual carbon dioxide emissions would increase by 13.2 million tons, equivalent to putting more than 2.5 million cars on the road.
